

DataGridViewColumn

```
classDiagram
    class JBToolkitWinFormsColorPickerColumn["JBToolkit.WinForms.ColorPickerColumn"] {
        +CellTemplate
        +ColorPickerColumn()
    }
    class DataGridViewColumn
    JBToolkitWinFormsColorPickerColumn --|> DataGridViewColumn
```

The diagram illustrates an inheritance relationship. The base class, `DataGridViewColumn`, is shown at the top with a gray background and three empty slots. The derived class, `JBToolkit.WinForms.ColorPickerColumn`, is shown at the bottom with a white background. It contains a `+ CellTemplate` attribute and a `+ ColorPickerColumn()` method. A blue arrow with an open triangle head points from the derived class to the base class.

JBToolkit.WinForms.Color
PickerColumn

+ CellTemplate

+ ColorPickerColumn()
